

Ideation Phase

Empathize & Discover

Date	18 October 2023
Team ID	Team-591658
Project Name	Machine Learning Approach For Employee Performance Prediction
Maximum Marks	4 Marks

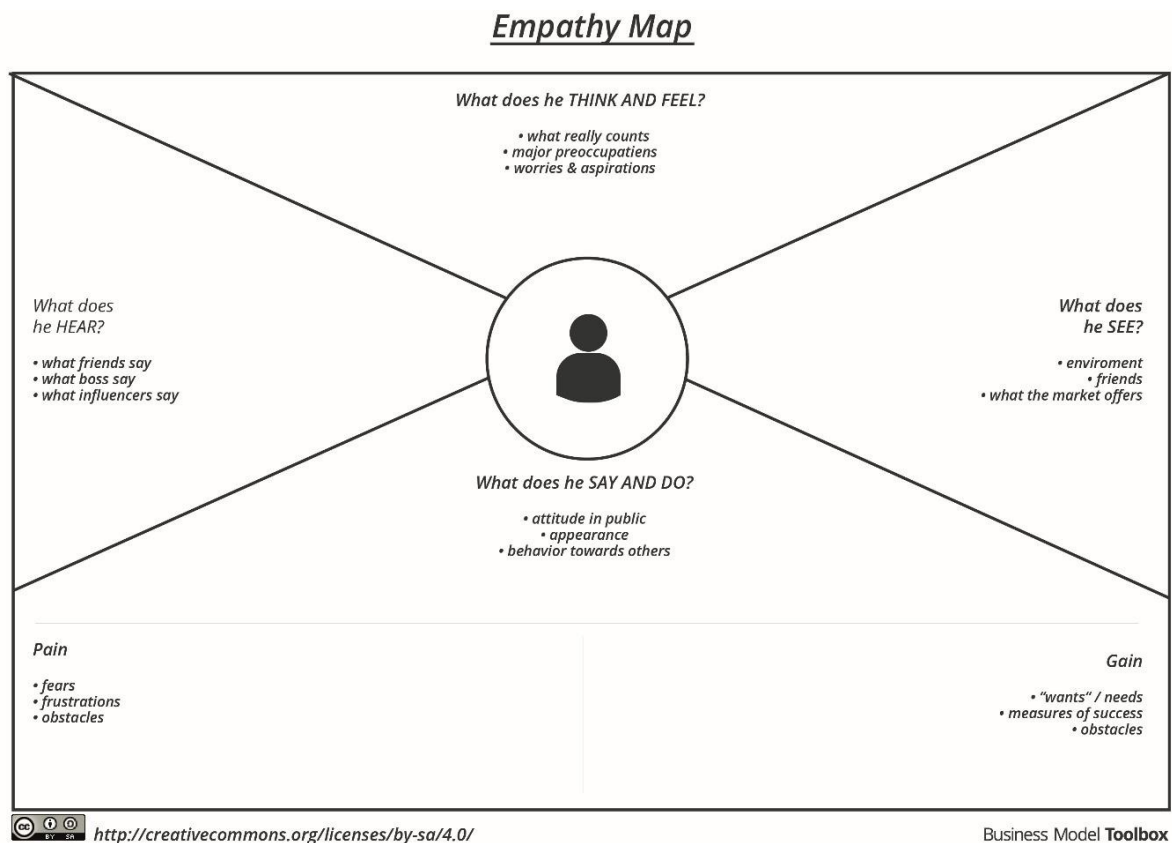

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Example: Machine Learning Approach For Employee Performance Prediction

Machine Learning Approach For Employee Performance Prediction

Enhance organizational efficiency with a machine learning approach predicting employee performance. Analyzing historical data, the system empowers decision-makers with insights into work behavior, aiding in proactive workforce management. Anticipate challenges, optimize resource allocation, and foster a productive work environment for sustained success.
